## Experience

**YashIT Services**                                July 24 to Dec 24
Frontend Developer                                         Online
- **Pest Control Website:** Designed and developed a platform with admin management for handling customer details and service records. Features include customer feedback, technician input (with signatures and photos), and PDF generation for records.

**Archi-Touch**                                   Mar-24 to Nov-24
Frontend Developer                                         Online
- https://archi-touch.vercel.app/
- **Archi-Touch Website:** Developed a personal website for an interior design service company with advanced animations and a fully responsive design using Framer Motion. The site highlights their services with smooth transitions and visually appealing interactions.

## Projects

**Forever Ecommerce**                                     Jan 2025
- https://ecommerce-frontend-1234.netlify.app/

Built a responsive e-commerce app with user-friendly design and admin management features using **React** and **Node.js**. Key functionalities include product management, user authentication, and seamless order processing with a focus on performance and mobile responsiveness.

**CourseHub**

Built a platform using **Node.js**, **TypeScript**, and **MongoDB**, where users can browse and purchase courses via the **Stripe** payment gateway. Integrated admin management with CRUD operations for managing courses and implemented secure user authentication and authorization for seamless access control.

**Youtube Clone**                                April 23 to Map 23
- Youtube Clone Link

Developed a fully responsive and user-friendly YouTube clone using **React.js** and RapidAPI to fetch and display YouTube videos. Features include the latest videos, video playback in 1080P and above, search functionality, and category-based filtering for an enhanced user experience.

**Blog Application**                               Oct-23 to Dec 23

Developed a full-featured blog application using **Next.js** with **NextAuth** for secure authentication. The platform is fully responsive and user-friendly, including an admin dashboard for managing blog posts and user activity.

**Evently – Event Management Platform**    Feb 2025 - March 2025
- https://evently-orcin-mu.vercel.app/

Developed a Next.js event platform with admin-only CRUD, Google/GitHub auth, and Prisma/PostgreSQL. Enabled ticket ordering, PDF downloads with QR codes for location and validation, and secure QR scanning via camera or file upload for event entry.
